

Assignment: 5

* Sample Business Requirement Documents Template :

Problems :

Nowdays peoples are facing many issues related to health And peoples are also finding solution over this. For making their problem and solution easier we can have one app. This app can help to patient related to health.

eg: If we need any preception over any disease so this app can connect a patient to a doctor sitting at home.

1) Executive Summary Snapshot :

- Research shows that everything is online nowadays, so health related issue can be solved online.
- The scope of the proposed project is to help the patient sitting at home.
- Also to provide all the information in details of deseases and care too.

2) Project Description :

- Why we need to take this project :
- It will spread more awariness of health in society
- And this app can available to everyone old to ~~you~~ younger.
- This can help people who can not afford the costly hospitllsation.

3) Project scope :

Project special goals :- To spread the awareness about health doing our best and best treatment.

Tasks :- We will first have an app and have all the specialist doctor on it who can give more information on the diseases or illness.

Cost :- Approximately we need 50,000 for website / app development & for paying expert doctors and team members. there are some legal fees & taxes associate and our companies.

Deadline :- We need time to make this project so we need to 6 week for first testing & 2 days for first testing. and after 2 months we should add feature.
